

This week in the Rural Activities Area

KS 2 and Ks 3 are enjoying feeding and handling animals big and small in the RAA.

Feeding our corn snake, Wendy with a dead mouse (brought from a reputable reptile feed supplier) leaves the class speechless until the meal is complete, then a host of interesting questions. Brendon asking why she only ate once a week, followed by interest into what else she could have instead.

Classes have also been learning how to groom and lead the horse Bengy, he is very big but easy to handle for even the smaller students. The sand school makes teaching the students how to lead correctly much easier and safer.

Our new guinea pig from Harry in primary is settling in nicely in her nice big pen. She seems to have quickly adapted to living with lots of other guinea pigs and rabbits.
